Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) OR THIRTY (30) DAYS, WHICHEVER IS LONGER, FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

Status

DETAILED ACTION

Claim Rejections - 35 USC § 102

1. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

2. Claims 1-6, 8-15 are rejected under 35 U.S.C. 102(b) as being anticipated by Silverman et al (US 6248058). Silverman discloses an injection device to be inserted in a probe 22 comprising a tubular member 31, a needle assembly 61 slidably disposed in the tubular member, a locking member for locking the proximal extremities of the tubular member and the needle assembly (Col. 6, lines 39-41). The needle member must have sufficient column strength to prevent buckling as it is inserted into the tissue or else it would be impossible to puncture the tissue and the device would be useless. The needle assembly includes an elongate portion 62 made of plastic (Col. 3, line 29), and the needle is made of stainless steel (Col. 3, lines 42-44). The distal face of the needle is inclined at an angle. The device comprises a supply of fluid as claimed (Col. 7, lines 25-30), and a prepolymer (col. 10, line 36). The device comprises an optical element (Col. 2, lines 62-64).

Claim Rejections - 35 USC § 103

3. The text of those sections of Title 35, U.S. Code not included in this action can be found in a prior Office action.

4. Claim 7 is rejected under 35 U.S.C. 103(a) as being unpatentable over Silverman. Claim 7 differs from Silverman in calling for the distal face of the needle to be inclined at an angle of

approximately 30 degrees. Silverman discloses an inclined tip but fails to specifically disclose the angle of inclination. It is well known in the art to use a needle having an angle of incline to meet the specific needs of the procedure in which it is to be used. It would have been an obvious matter of design choice to include a needle having a 30 degree incline.

Response to Arguments

5. Applicant's arguments with respect to claims 1-12 have been considered but are moot in view of the new ground(s) of rejection.

Conclusion

6. Applicant's amendment necessitated the new ground(s) of rejection presented in this Office action. Accordingly, **THIS ACTION IS MADE FINAL**. See MPEP § 706.07(a). Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

A shortened statutory period for reply to this final action is set to expire THREE MONTHS from the mailing date of this action. In the event a first reply is filed within TWO MONTHS of the mailing date of this final action and the advisory action is not mailed until after the end of the THREE-MONTH shortened statutory period, then the shortened statutory period will expire on the date the advisory action is mailed, and any extension fee pursuant to 37 CFR 1.136(a) will be calculated from the mailing date of the advisory action. In no event, however, will the statutory period for reply expire later than SIX MONTHS from the date of this final action.
